5.2 STAFF

5.2.1 – Staff Queries screen

Screenshot of screen – STAFF	Information
 The screenshot shows the 'StaffQueries' application window. On the left, a 'Filter by:' dropdown menu is open, displaying five options: 'display all staff (firstname asc)', 'display all staff (firstname desc)', 'display all staff (staffID asc)', 'display all staff (staffID desc)', and 'display all staff (surname asc)'. The 'display all staff (staffID asc)' option is currently selected. Below the dropdown is a table of staff members with columns for Staff ID, First name, Surname, Telephone number, and Job role. The table contains 21 rows of data. On the right side of the window, there are four search input fields: 'Search Staff first name:', 'Search Staff surname:', 'Search Staff Telephone number:', and 'Search staff job role:'. Each field has a corresponding 'RESET' button. At the bottom right, there are two buttons: 'Return to Main Menu' and 'Go to Staff Manager'. The 'Result set size:' is displayed as 21.	Selecting the ‘filter by’ combo-box displays the various sorting options, that will sort the datagridview.
 This screenshot shows the same 'StaffQueries' application window, but the 'Filter by:' dropdown is now set to 'display all staff (staffID asc)'. The table of staff members is sorted by Staff ID in ascending order. The first row shows Staff ID 25, John, Doe, 1234567890, Assistant Driver. The last row shows Staff ID 43, Ethan, Scott, 1234567898, Driver. The 'Result set size:' is now 21.	‘display all staff (staffID asc)’ item has been selected from the combo-box, which sorts the datagridview by ascending staff ID.
 This screenshot shows the 'StaffQueries' application window with the 'Filter by:' dropdown set to 'display all staff (staffID asc)'. The search input field for 'Search Staff first name:' contains the text 'ella'. The table of staff members is filtered to show only those with the first name 'Ella'. There are four rows of data displayed. The 'Result set size:' is now 4.	Using the textboxes on the right, the user can search for a specific staff member by firstname, surname, telephone number and role. In the image, all of the staff members with the first name of ‘Ella’ have been displayed.

5.3 Vans

5.3.1 – Van Queries screen

Screenshot of screen – VANS	Information
 The screenshot shows the 'VAN MANAGER' application window. On the left, there is a table with columns: Van ID, Registration number, Mot due, model, color, and size. The table lists 29 vans. On the right, there is a 'Search Van ID:' dropdown menu with a 'RESET' button. The dropdown menu is open, showing a list of van IDs from 118 to 142. The 'Result set size: 29' is displayed at the bottom left.	Pressing the van ID combo-box will display all of the IDs of every van in the database.
 The screenshot shows the 'VAN MANAGER' application window with search filters. The table on the left is the same as in the previous screenshot. On the right, there are four search fields: 'Search Van ID:', 'Search van Registration:', 'Search van model:', 'Search van color:', and 'Search van size:'. The 'Search van size:' field has 'medium' selected. There are 'Return to Main Menu' and 'Go to Van Manager' buttons at the bottom right. The 'Result set size: 29' is displayed at the bottom left.	User can search for a specific van in the database by filtering using the fields. In the image, a van size of medium has been selected, filtering and displaying all of the medium vans in the datagridview.
 The screenshot shows the 'VAN MANAGER' application window with search filters. The table on the left is the same as in the previous screenshot. On the right, there are four search fields: 'Search Van ID:', 'Search van Registration:', 'Search van model:', 'Search van color:', and 'Search van size:'. The 'RESET' button is highlighted with a red box. There are 'Return to Main Menu' and 'Go to Van Manager' buttons at the bottom right. The 'Result set size: 29' is displayed at the bottom left.	Pressing the reset button will clear all fields and refresh the datagridview.

5.4.1 – Maintenance Queries screen

Screenshot of screen – MAINTENANCE	Information
 The screenshot shows the 'MaintenanceQueries' window. It features a table with columns: maintenanceID, vanID, regio, motDuDate, maintenanceType, maintenance start time, and maintenance end time. The table contains 12 rows of data. Below the table is a search area with fields for 'Search Staff First Name', 'Search Staff Surname', 'Search Van registration number', and 'Search MOT due date'. There are also buttons for 'Return to Main Menu', 'Maintenance Stock Manager', and 'Maintenance Manager'. A message at the bottom says 'Right-Click cell to manage maintenance!'.	This is the maintenance queries screen, where users can search for maintenances existing in the database.
 This screenshot shows the same 'MaintenanceQueries' window, but the 'Search Van registration number' dropdown menu is open, displaying a list of van registration numbers: RPZ 8901, GHA 234, CC 567, FF 5678, II 678, KK 234, PP 8901, and QQ 234.	Clicking on the van registration combo-box will display the registration numbers of every van booked for a maintenance.
 This screenshot shows the 'MaintenanceQueries' window with the 'Search Maintenance ID' dropdown menu open. It displays a list of maintenance IDs: 122, 123, 124, 125, 126, 127, 128, and 129.	Clicking on the maintenance ID combo-box will display the IDs of every booked maintenance.

ADD

Maintenance manager

After selecting a stock item to be added to the selected maintenance, users can adjust the quantity to be used for the maintenance using the numeric up-down.

As shown in the images, solid items can be added by integer, whereas liquid items can be added by decimals. This is because liquid items are measured by liters.

Upon selecting a quantity, the 'total maintenance cost' label will update to display the total price of the maintenance, including every other stock item added.

EXIT < ADD MAINTENANCE

Selecting the driver combo-box will display all of the drivers that are ready to work.

	If a mechanic or driver has been booked for another maintenance for the selected date and time, a warning symbol will be displayed.
	If an MOT exam has been selected, a yellow symbol beside the MOT due date of the van will appear, to indicate that the van is not yet due for an MOT exam. Furthermore, if an MOT exam has been chosen, and the selected van has not yet done an MOT service within a month, then a warning symbol will be displayed beside the maintenance type combo-box.
	If an MOT exam has been selected, mechanics will not be available, only drivers.
	By pressing the 'Edit maintenance' tab, users can edit a maintenance booking and its details.

Once the status has been updated to delivered, users can report any discrepancies inside the textbox.

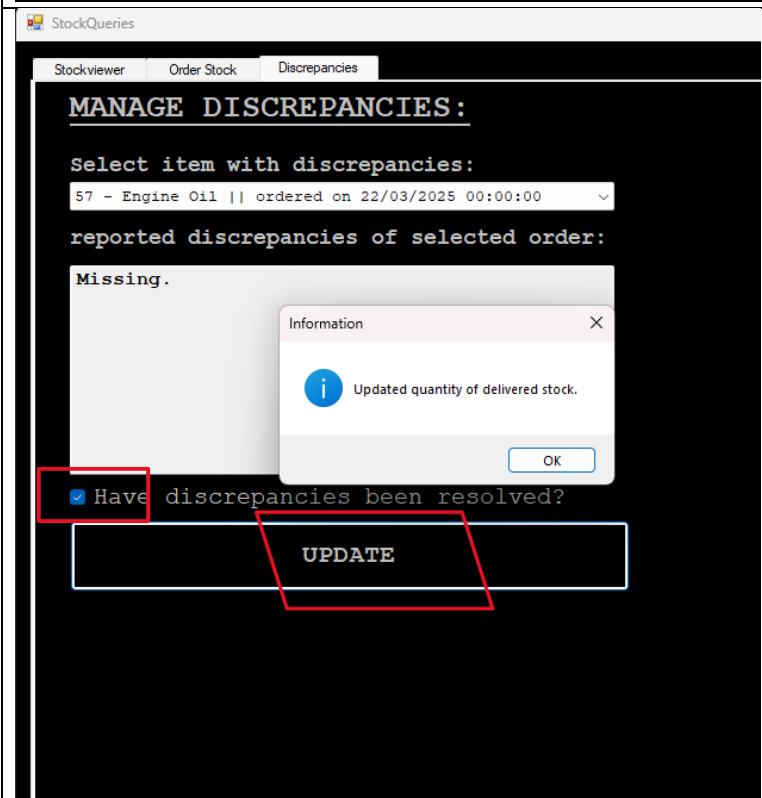

If an order has a reported discrepancy when updating its status, the stock quantity will not be updated. Users can choose to go to the discrepancies tab to resolve the discrepancy of the order by clicking 'yes'.

Users can see any orders with discrepancies in the data-grid view as shown in the image.

5.6.3 – Discrepancies tab

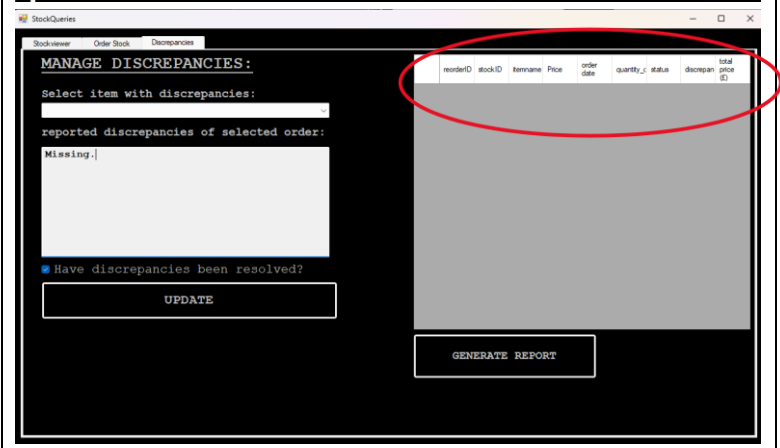

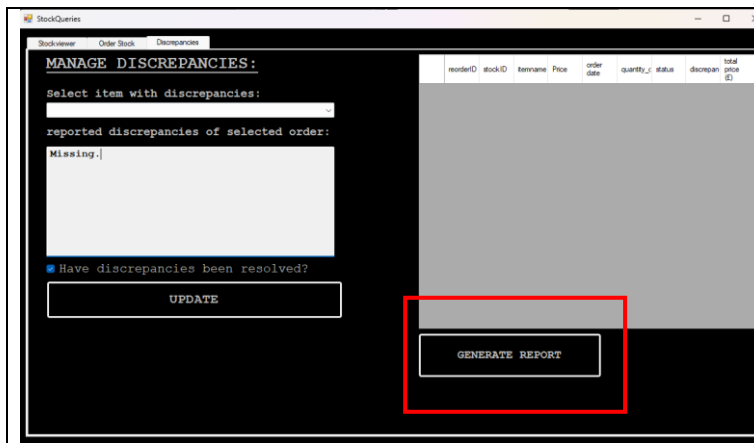

In the discrepancy tab, users can select an order with a discrepancy.

Once an order with a discrepancy has been selected, mark the checkbox as checked to resolve the order and press update.

After update has been pressed, quantity of the stock will be updated and the order will disappear from the discrepancies data-grid view.

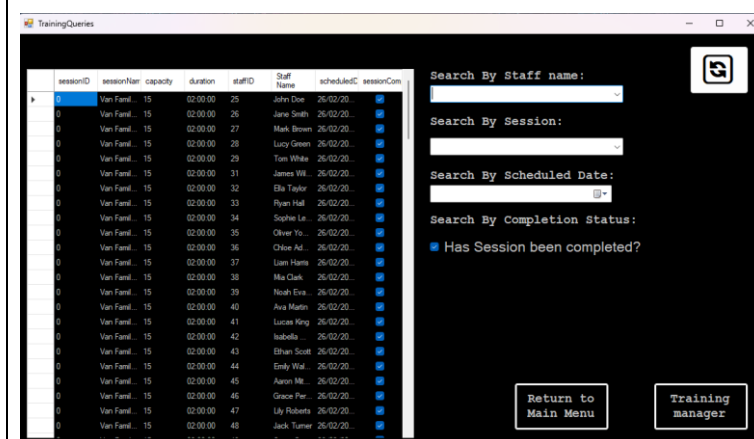

Users can generate a report containing all of the orders with discrepancies listed.

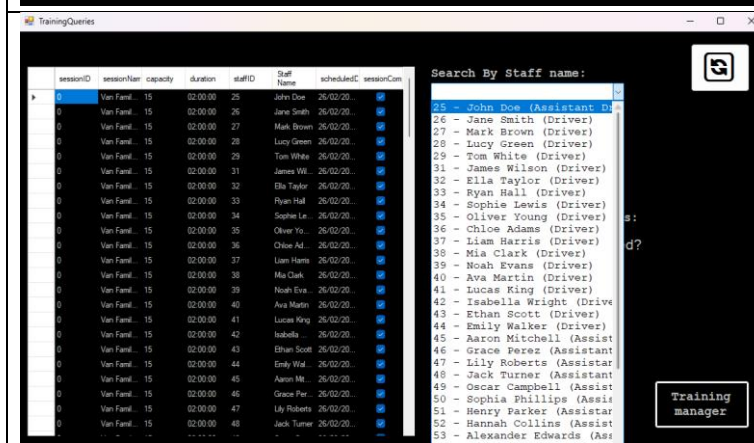

5.7 Staff Training

Screenshot of screen – STAFF TRAINING

Information

This is the training queries screen, where users can search for any training session related to any staff member. Only managers can access this section of the application.

By clicking on the staff name combo-box, users can search for a specific staff member existing in the database.
